Your Ref; FP/153/11/

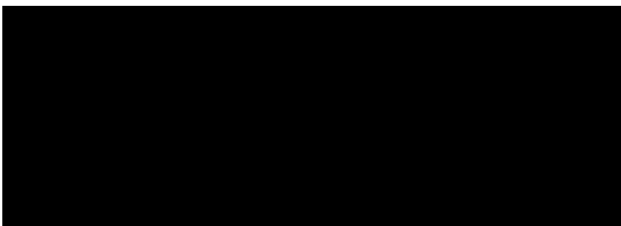

8th September 2011

Dear K. Rawling,

Further to our communication of the 22th Sept 11, I have redrawn the West Elevation of this dormer at 64 Wroxham Way, Felpham as you have further requested. I have also included another revised floor plan so as you can see the reason as explained before as to why I was unable to draw two dormers, however you will see that I have also as requested reduced the length of the dormer again by approximately another 600mm.

I have dropped the roof by 50mm, which is the most I can do, and I am counting on the structural engineer to find the answer to maintaining the inside storey height, probably a reinforced joist, eg. Two joists with a 10mm steel between them at whatever centre's. This way will enable us to reduce the floor level. I look forward to your comments.

Yours sincerely

Keith Trotman.

K. TROTMAN. BSc. (HONS). FM. MICT ret. Dip C. Eng. Dip Bld Mg Surveyor.

PROPOSED DORMER ON EXISTING WEST ELEVATION

K. TROTMAN.
