To whom it may concern

Re: REF: FP/155/13T

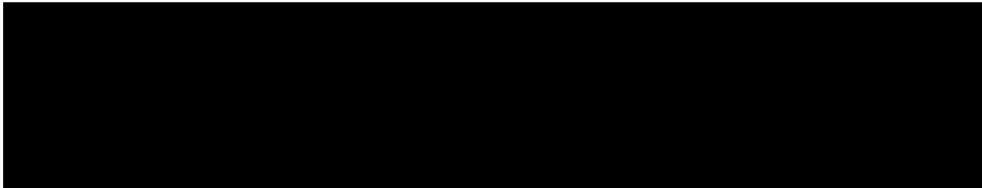

I reside at The Stables, 16 Manor Copse, Felpham, West Sussex, PO22 7AT. At the rear of the property there are two trees that have grown too close to the existing dwelling which was built around 1850'ish.

The trees have become very unsightly. The south face was removed around 10 – 20 years ago. It is very obvious to see that the foliage has failed, and for the second year running.

The trees both appear to be diseased, with very little foliage, blossom or fruit.

I am very concerned of injury to myself, or damage to the property from falling branches in wet and windy weather due to the close proximity of the trees to the dwelling.

It has been proposed that new trees will be planted 6 – 8 metres high which will be sustainable in the long term.
