POLICY COMMENTARY

The above policies combine to describe the criteria against which the application will be assessed particularly with regard to visual and residential amenity.

DEVELOPMENT PLAN AND/OR LEGISLATIVE BACKGROUND

Section 38(6) of the Planning and Compulsory Purchase Act 2004 states:-

"If regard is to be had to the development plan for the purpose of any determination to be made under the planning Acts the determination must be made in accordance with the plan unless material considerations indicate otherwise."

The proposal is considered to comply with relevant Development Plan policies in that it would have no materially adverse effect on the visual amenities of the locality or the residential amenities of the adjoining properties, nor would it have an adverse impact upon the established character of the surrounding area.

OTHER MATERIAL CONSIDERATIONS

It is considered that there are no other material considerations to warrant a decision otherwise than in accordance with the Development Plan and/or legislative background.

CONCLUSIONS

The application seeks to construct a two storey and single storey extension on the rear of the

dwelling to replace an existing single storey extension.

The proposed two storey will be set in line with the existing rear flank wall to create an extended kitchen on the ground floor and extend the bedroom above. The single storey element will be set in line with this extension and increase the size of the kitchen with a utility area. The two storey extension has been designed with a lower ridge height than the existing roof line so will not be visible from the front of the site and the single storey extension has a hipped roof that will be set lower than the existing first floor windows.

With regard to residential amenity the neighbouring property to the west No 117 is set forward of No 119 and is sited approximately 6m away and the neighbouring property to the east No 121 which is set back from No 119 is sited approximately 6.8m away. With adequate distance to both properties it is not considered that the proposal would detrimentally harm the occupiers by way of overbearing affect, harmful overshadowing, overlooking or loss of privacy.

The proposed extension is an acceptable size and height that is considered to be visually subservient to the host building. Due to its rear location it will not be readily visible in the street scene, nor would it harm the established character and appearance of the surrounding residential area.

It is therefore recommended that the application be approved, subject to the following conditions.
