Dafydd,

You are correct the only ones covered are the Hawthorn trees.

Hi Janice,

I thought there was just One TPO active on the Hawthorn trees here (TPO/4/62), not one on the conifer hedge line. If the conifer hedge line does have an active TPO the following conditions are to be met:

- 5 or more individuals to be replanted (because of the available space).
- The chosen replanting stock to have an expected mature growth height of 4 meters and higher
- Individuals to be replanted within 5 meters of original existing trees location.

Kind regards

Dafydd

Thanks

In view of the conifer hedge being removed shall I impose a condition regarding a replacement tree(s).

Thanks

Janice
