This service is designed to inform members of the public, in line with our terms and conditions. For business or commercial use, please contact us.

Use our map to find out which flood and coastal erosion risk management activities are happening near you.

The map shows activities that we will carry out alongside local authorities and internal drainage boards in the financial year 2014/15. The planned activities will either reduce the risk of flooding and coastal erosion or maintain the current level of protection.

We have assigned each new flood asset a colour according to its funding status. A project may be fully or part funded by flood and coastal erosion risk management grant in aid from Defra (FCRM GiA), depending on the benefits it creates.

See our website for more information about the information shown on the map.

Flood and coastal erosion risk management activities map

See our website for more information on the partnership funding approach.

Partnership funding

Information Warning

Please note that the maps show the areas where investment is being made to reduce the flood and coastal erosion risk. They are not detailed enough to show the impact they may have on individual addresses, which may not always face the same risk of flooding as the areas that surround them. Also note that funding figures are indicative and any use or interpretation should account for future updates where annual values may change.
