No objection would be raised to the plans, as highlighted within previous application the installation of the guard railing has the potential to restrict/make difficult movements by adaptive bikes/trailers/tandems but this would need to be balanced against the need to restrict motorcycles.

LTN 1/20 offers the following guidance.

Access controls can reduce the usability of a route by all cyclists, and may exclude some disabled people and others riding nonstandard cycles. There should therefore be a general presumption against the use of access controls unless there is a persistent and significant problem of antisocial moped or motorcycle access that cannot be controlled through periodic policing.
