I am astonished by the fact that the owner of the Field seems to get away with most of his plans for the field ! He just does as likes! and then requests planning after he's already done it ! Then gets his own way!

He is ruining our whole environment!

I dread to think how it's going to end up?!

The environment agency should be checking up on the state of the Rife! Back in the summer the Silt floating on the surface was awful, there doesn't seem to be any Life left in the Rife. We used to have wildlife all the time, Swans,Ducks, fish maybe even Voles,who knows? It does not look as if there is any life in there. I wonder what happens to all the horse manure? Even human untill recently when a chemical unit turned up, but where is that emptied?

To finish, what agriculture is carried out there??

The amount of various Vehicles that go in and out, Lorries, a car transporter, vans,cars,motor bikes being ridden around there one day. Various large earth moving diggers. I will end now, living in dread of what HE is going to do next.

We will not be able to refer to our area as Residential !! What with the ruination of our environment one way and all the industrialisation of Shripney Road .

Maybe we will be able to lower our classification of our Council Tax?!
