Dear Mr Wymbs,

Thank you for your email regarding the above. I believe Ian Brewster is on leave this week, but should be returning to the office next week, so you should be able to contact him then to discuss the application and a suitable description for the proposed works.

Kind Regards,

Amelia Stroud

Hello Amelia,

Many thanks for your email. I must have mis-understood our last conversation because I thought that you were happy to pass the original plan of 30 - 35 % Crown reduction. So sorry about that. Havent spoken to Ian Brewster about description of work yet, but he is certainly more than welcome to phone me at work on my mobile 077 909 033 55 or home number 01243 585 902.

As I mentioned to you before, in an ideal world I would like to reduce tree naturally and back to relevant growth points so it doesnt look too harsh. And although I can see the reasoning of a straight forward pollard, dont want to leave my customer with it looking harsh, and as I know I can leave tree looking nice and back into balance without the need for pollarding , I am reluctant to do so.

Just to also make you aware that this tree has been severely mistreated in the past (certainly not by us), so all I am really looking to do is put it back into a better shape.

Let me know how it goes, and please dont hesitate to contact me for further questions etc.

Many thanks again Amelia,

Kevin

Dear Mr Wymbs,

Following our telephone conversation of last week, I was just enquiring as to whether you had yet discussed the issue of the description of the proposed works with Ian Brewster?

I look forward to hearing from you.

Kind Regards,
