Importance: High

Claire,

Following my email correspondence at the end of last week, please see attached the following information:

FP/19/17/DOC

- Updated SUD's statement – Wording has been updated to show details of the maintenance for the land drain.

FP/145/16/DOC

- Full hydraulic calculations to prove that the 1 in 100 year storm event + climate change can be stored on site/within the pond/s.
- Full construction details for the drainage elements, including the pond headwall.
- Plans/details showing what has been agreed for the various watercourses within the site. Consent/approvals from the Environment Agency should also be provided.

Please note link below for all pond & drainage drawings
[REDACTED]

Please note all of the above has previously been submitted and discharged historically by the local authority in relation to the surface water drainage. I am hoping the condition can be discharged on this basis.

If you need any more information on this, please let me know.

Kind Regards

Robert Barber

EXTERNAL EMAIL WARNING

Please do not click on LINKS or ATTACHMENTS where you are unsure of its origin. In such cases delete the email.

Rob,

I wrote last month to request that the maintenance manual for the drainage needed to be updated and resent with details of maintenance for the land drain (under FP/18/17/DOC). I have not yet received this updated document. Please could you send by the 24th Nov otherwise I will have to refuse the application.

In relation to FP/145/16/DOC Drainage Engineers have requested the following (which I forwarded to you on the 10th October) in respect to FP/90/13;

1. Full hydraulic calculations to prove that the 1 in 100 year storm event + climate change can be stored on site/within the pond/s. A supporting pipe network plan should also be provided with pipe lengths numbered to correspond to those in the calculations.
2. Full construction details for the drainage elements, including the pond headwall.
3. Plans/details showing what has been agreed for the various watercourses within the site. Consent/approvals from the Environment Agency should also be provided.

Please could this information also be sent by the 24th November, otherwise this DOC will also have to be refused.

These are the last outstanding matters for these DOCs so it would be good to get them agreed as soon as possible.

Kind regards

Claire
