47. Antony's Road.

Helpham, Bognor Regis,

West Sussex, PO22 8NF.

I am writing to inform you of our pleasure we are to reach the proposal to remove the very large poplar trees at 47 Antony's Road. This tree has been rather unpleasant to live with for about a month or so every year in the summer because of the nuisance it has caused when it deposits rather unpleasant white fluffy excrement. This year it has been so bad that during the time the deposit was coming down floating in the air, nobody could have their windows open during May and June, also part of July when it was so very bad, as this deposit drifted indoors, and made a mess on peoples floors and furniture, also I would have considered this a health hazard.

We have lived in our home for close on forty years, my wife was as a child brought up in this house and the word nuisance is, even she never remembered this problem as so bad, but over the time we have lived where we are it has steadily got worse each year. The trees roots are also lifting the wall near the pavement.

Many thanks in anticipation of the trees removal.

Yours Sincerely
