Dear Nicola,

I hope you are well.

I have just received your email informing me that the map I submitted for the above application, doesn't show the trees as mentioned in the application.

I circled G2 as that is the area that the trees in question are located in, according to that map which is recorded under TPO/FP/1/07 which appears to cover that area of the golf course.

I found the T38,39 and 43 codes in a past application which was rejected. I have attached a copy of this application here which may help identify the trees I am referring to. I have also found the map which accompanied our tree hazard inspection in 2019, this map lists the trees as T38, 39 and 43 in their correct positions, I have attached that here.

Following the refusal of the original application to carry out works to these trees, I met Mark Warwick on site to discuss the works further. That is when he emailed me the text to include in the new application which I submitted yesterday.

Sorry if this isn't very clear, I haven't had to go through this process before.

Kind regards

*James Maclean
