TREE WORKS ON THE BEACH ESTATE, FELPHAM

Dear Mrs Bourgein

Further to my visit today I enclose our following costs for tree works discussed.

T1. Large Macrocarpa on the north verge of Copeland road. This tree can be pruned back by approximately 20% and its lower canopy lifted. This work would remove between three to five years growth.

~~T2. White Poplar tree to the east of the evergreen Oak which we discussed. Fell the Poplar tree and grind out the stump. The root system will send up suckers but regular mowing should sort them out.~~

T3. Evergreen Oak tree next to T2. This is a healthy young tree with a good future, if the tree is pruned to establish a good branch structure. The first stage of pruning works will enable good access around and under this tree. I would recommend another session on the tree in three years time.

Cost of T1: £380.00

Cost of T2: £220.00

Cost of T3 first stage of pruning: £150.00

For your protection all of our work is covered by £10 million Third Party and Public Liability Insurance. If you require more details they will be gladly be provided. We look forward to hearing from you.

Yours Sincerely

John Bentley ND arb
