Good Afternoon Bradley

As per our earlier telephone conversation, please see below potential fencing specifications and football goals.

Fencing:

As discussed there are a number of fencing options to consider, for football the most traditional is the 8/6/8 twin bar system with a 1.2m high super rebound panel. *See attached specification* ('3030 DualTech Rebound.pdf') Alternatively, there is also the 1.2m high wisa board options ('rebound' boards), these are commonly used at five-a-side sites such as 'Goals'. The wisa boards are effectively 'in-play' and balls can be played off them etc.

The WISA Board specification is as follow:

12mm 1220mm x 2525 FSC Rigaform Board Smooth 220G Dark Brown Phenol 2 Sides. Birch T/O Core EN636-2, EN13986, EN314-2: Class 3 Phenolic Resin Bonded Triple Edges Sealed

As requested please see below specification for the ball stop netting:

Polyethylene Football Netting:

Good general purpose, UV-stabilised polyethylene stop netting for ball sports or industrial applications. Overlocked edges for extra strength. Ideal for installations that are exposed to strong wind. Light but very strong and durable. 2mm twine, 100mm x 100mm mesh.

Sports Equipment (Football Goals):

Please see attached specification for full size socketed goals (natural pitch only) and for free standing full size goals (can be used on natural or artificial pitches).

Socketed goal '**FBL-548-C**', free standing self weighted goals '**FBL-435**'

Should you require any further information/documentations, please do not hesitate to contact us.

Best Regards

Gary Smith
