Hi Amber

I had an appointment on site yesterday with the Grounds Maintenance Manager, Colin Hellyer, a close colleague of Mr Hull, with whom I have also spoken recently. At this time I was able to observe sufficient evidence of decay and structural defect on the trees sought for removal, to justify their exception from the normal application process.

I can confirm that both the standing stem of (formerly a twin-stem) one ash and adjacent single stem ash tree to the north, both in the rear garden of 21 Croft Way, are in an imminently dangerous state.

I recommend we advise the applicant [REDACTED] that we have no objection to the removal of both standing trees and the clearance of fallen material, at their earliest convenience.

Regards,

Mark
