

Application No: FP/274/21/OUT

I agree with the conclusions of the geophysics report and the desk-based assessment regarding the potential that this site has to contain deposits of archaeological interest and their likely importance. I also agree that the impact of the proposed development on that interest might be adequately mitigated through a staged programme of archaeological evaluation and preservation of significance by record and/or in-situ. This process would be best secured via the imposition of a suitable standard condition, e.g. a version of ARC1 as follows:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.
