Subject: FP/48/15/OUT Planning Decision

Yesterday's decision to give the go ahead for the above application was quite obviously a foregone conclusion and my wife was wasting her time putting her appeal in front of your committee. But she wanted to try as we have lived in our house for more than 30 years and the prospect of looking out onto a brick wall instead of trees from our back garden filled her with dread.

There is no need for this house to be built, it is just a money making exercise by the owner and your decision has handed him a bonus of £100,000 and he will now move elsewhere, presumably with a big garden, and do the same thing again with another set of unsuspecting neighbours. My family has now been left with the decision of whether we now sell up and move on also, thanks for that!

Garden infilling is becoming an epidemic and if you cannot see the damage it is doing, you are clueless.

Arun District Council and WSCC have already done so much damage to Felpham with the decision of a huge housing estate with no shops, no doctors, no schools... nothing! Instead you go back on your word and double the size of the existing local primary which sits in a very tight housing neighbourhood and has already caused traffic chaos for years. The traffic in Felpham is now like the M25 and it is all down to the poor decisions made by our local Councils and yesterday you made yet another poor decision that has affected lots of people's lives. But you do not seem to care about that do you?
