

BIODIVERSITY ENHANCEMENT STATEMENT

FOR

EXTENSION & NEW DWELLING

AT

6 ORMESBY CRESCENT
BOGNOR REGIS
PO22 8EN

April 2026

Site Assessment

6 Ormesby Crescent is located in an established residential area and away from any ecologically sensitive areas. There is no evidence of any habitats of ecological value on site.

Proposals

The proposed extensions are replacing a conservatory, garage and other hard landscaped areas. Therefore the affected area of the site is of low ecological merit.

Existing planting will be maintained where possible and additional planting added as appropriate. Hard landscaped areas will be kept to a minimum to comply with required standards but maintaining potential habitats.

The gable ends to the existing property are maintained and provide opportunity for bat and bird nesting boxes. Equally the existing tiled roof does offer some opportunity for bat roosts.

Conclusion

The proposed extension will not adversely affect the local biodiversity and has the potential for some enhancement.
