

26th APRIL 2017

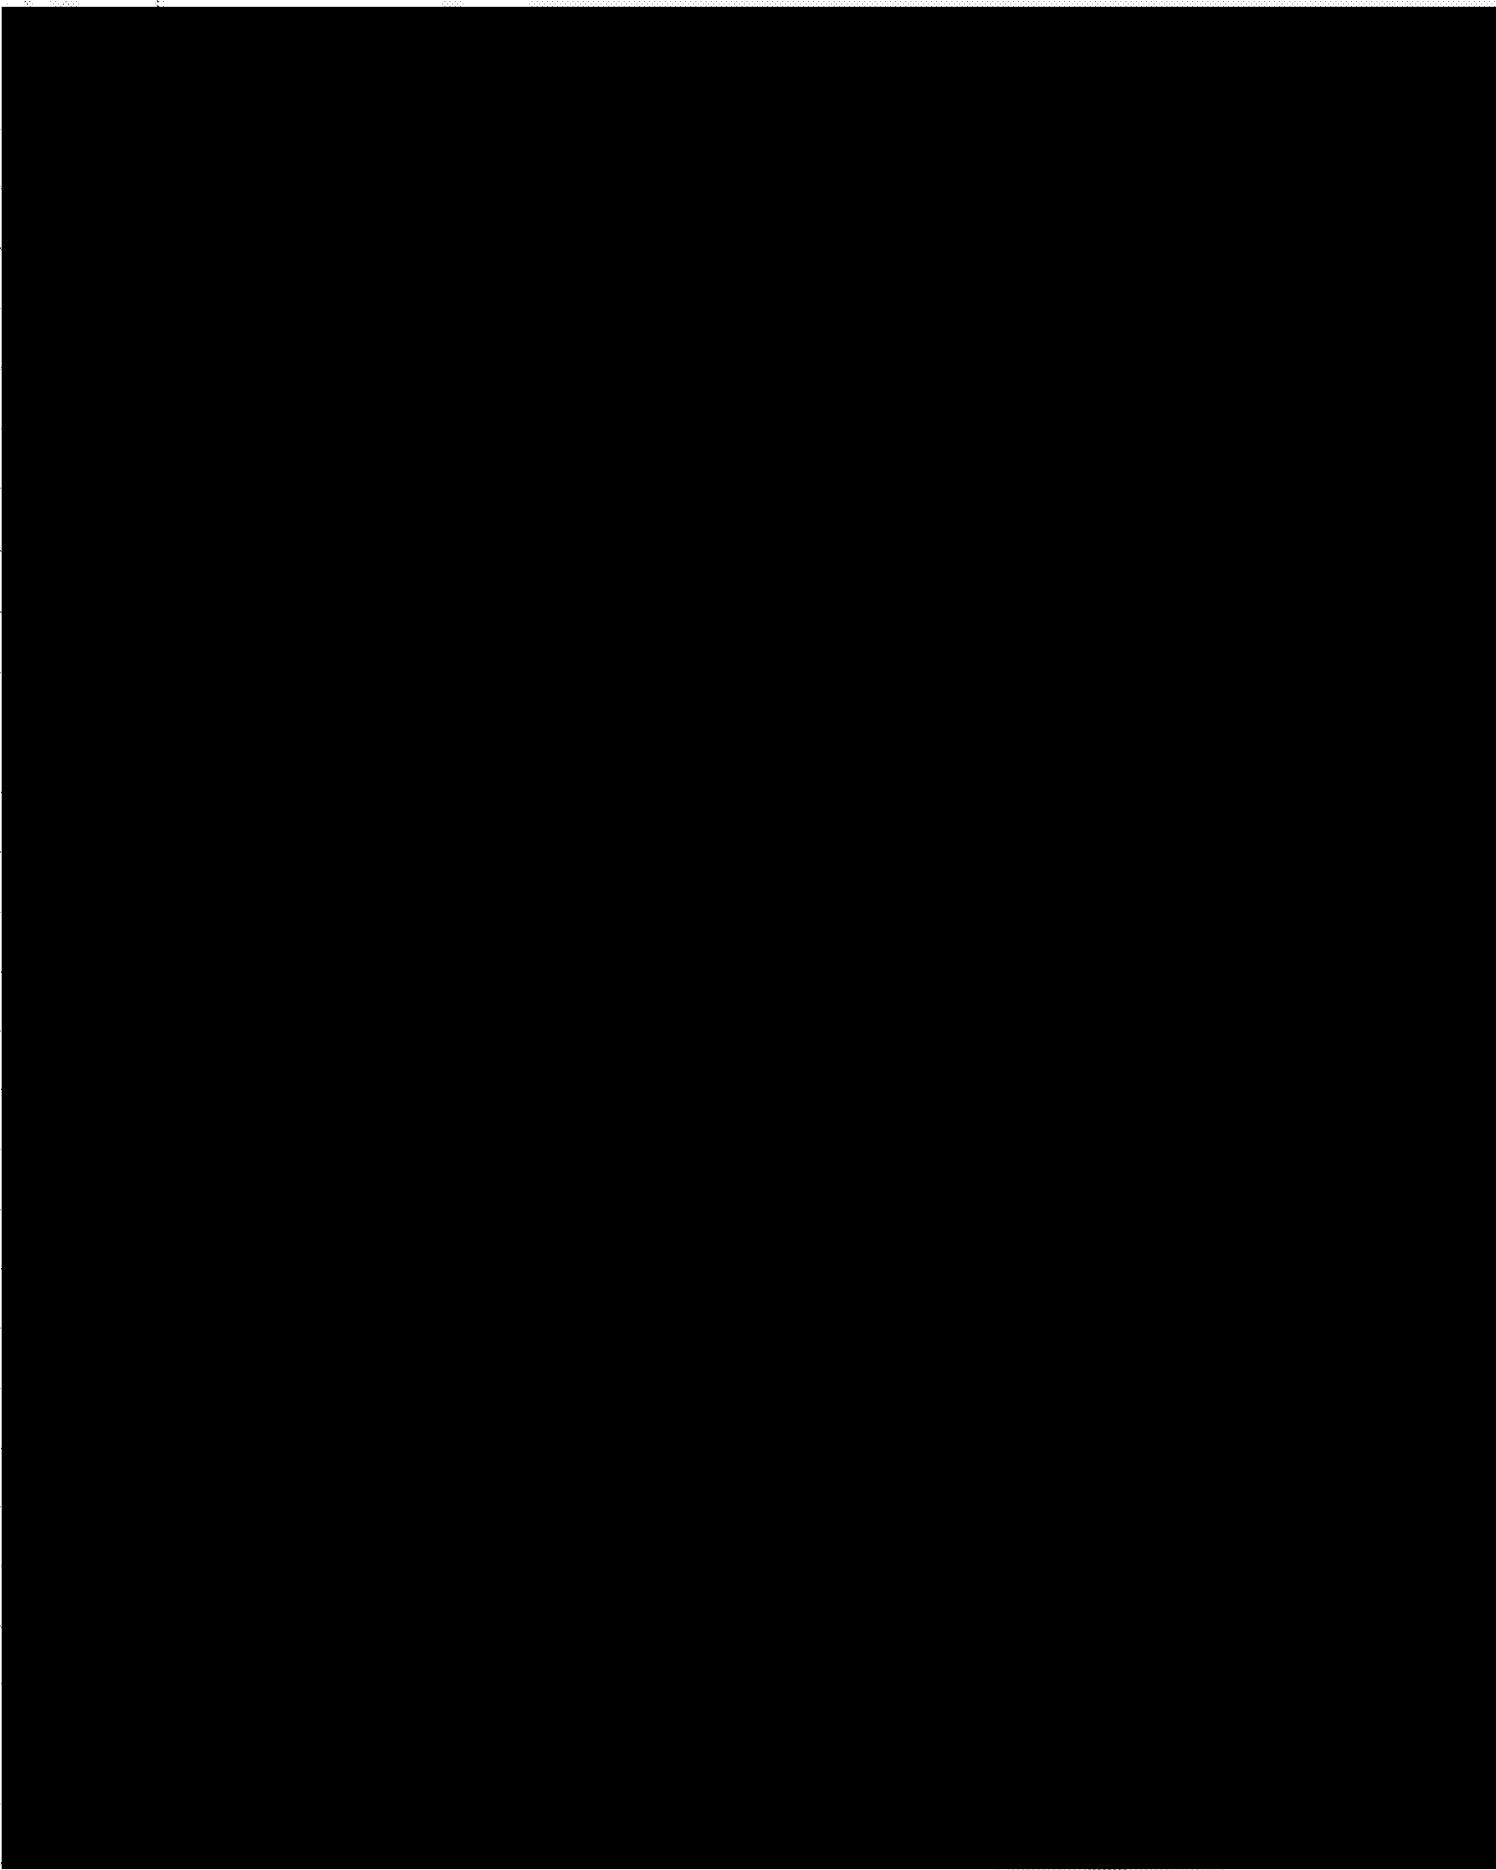

Myself and my partner tried to purchase Mow Cottage back in 1998 but the family declined the offer. We asked to rent the property, to keep it in good condition, and live there, but again was turned down. So the property was left empty, and so vandalised, and then destroyed by fire, damage also being done by travellers entering the site. I have always tried to keep the property in the family, as I have all my memories there with my family, and loved to help out on the land. I would like to follow in my ancestors footsteps, and keep our heritage, and I am the only member interested in doing so. We now have another opportunity to do this, and hopefully re-build Mow Cottage once again into a lovely family home.
