Dear Sir/Madam

With regards to the above Planning Application, I am against retention of Extractor. I have been keeping a diary from when the So India opened 3 years ago. From the start we have experienced the unexceptable smell from the Chimney. It affects our day to day living. We cannot have our windows open at all in the summer. The smell some days is all round the house. We cannot use our garden with friends because of the smell.

The smell is so bad sometimes it makes you feel sick, it comes in drifts.

Sometimes the smell will start at 10 o'clock in the morning and then carry on until about 2.30 - 3.00 then you get a short break until about 5.30 - 6.00 pm and it all starts up again. It is there most days in the summer. Also I have to get my washing out very early to try and dry it before the smell starts, on a few occasions I have had to get it in and re-do it as the smell has got into it. Also last year they laid up tables for eating out on the decking which brought the smell out as well. It is like a lottery, it can sometimes be a couple of days with no smell but not very often, then its back with a vengeance when the wind is coming from South/Southwest, which it usually is in the summer. Yours faithfully
