Hello Amber

We have a garden licence and this would massively reduce the amount of garden space allowed, which would effect our vegetable garden, new fencing which has been erected and shrubs that have been planted, all coming to around over £1000 . Fencing has to be replaced as part of the garden licence. We also pay £250 per year in advance for this garden licence. It would affect this massively.

No notice outside the property that would have alerted me to the new planning permission, I was only alerted by a neighbour who had one outside his property in The Grove.

The officers report has said only 1 objection had been received and there was at least nine in by the 19th May . Are you able to explain this please?

Also very concerned about the height of the structure 5.85 metres which will impact on the view we currently have .

We think its a prelude to a change of use for the structure, ie another building.

No one here wants this structure, my neighbours are furious and so are the residents in this building.

I await your response

Angela Barnes
