The reason for the proposed change is to provide a suitable living space for our disabled son. He has cerebral palsy and increasingly needs to use his wheelchair. All the internal doors are to be removed to create a single level free flowing space between the various rooms for wheelchair access. We also have 3 other children (one is Autistic) so the changes need to accommodate suitable arrangements for them as well. The current property has 3 bedrooms all on the first floor. The proposal is to extend the ground floor of the house to provide a wheelchair friendly family kitchen to allow the existing kitchen to be converted to downstairs bedrooms for the two children with special needs.
