Hello Mr Roberts

In para 4.1 of my report attached to application I did suggest a number species to replace the one tree that would give all concerned options to decide on. If I have to be specific I would choose Silver Birch.

4.1 *As the tree has got larger since application to fell in 2001 now outgrown its current position and removal is the preferred option by the owner and neighbour rather than prune every few years. If removal is permitted a replacement of a more suitable species would be planted during the next planting season of a deciduous species. Also the adjoining deciduous trees would benefit and be able to develop. Suitable garden species to replace with could be from the following: Birch, Crab apple, Cherry, Foxglove tree, Handkerchief tree, Mountain ash, Pride of India and Whitebeam.*

Regards

Phillip Ellis
