Hi Simon,

The timber for the gate will be from Gardiner & Scardifield who have advised they do not have a brochure for the timber but it is pressure treated external sawn timber which is treated in a water based Aqueous solution. The timber is a natural light/medium brown wood colouring so will be finished to the design in the application and will be finished using Cuprinol all purpose wood treatment which is a natural clear preserver again of a water based solution (see attached).

Natalie,

The condition requires details of the finished colour & wood treatment of the fencing, gates & posts. So I need all details now. Please therefore provide details of the wood to be used for the gates. I don't need a sample, a product specification or say colour brochure extract will do.

Kind Regards
