James

Please find attached plan DG/ES/FOR/R24/01 of the east access detailing the vegetation and red/blue line boundaries.

The Appendix 4 plan TE/1093/309 shows the footway along the verge and any staff cycling to our site would use the re-surfaced road.

The use of the verge requires overhanging branches from shrubs located to the north to be cut back.

The acoustic fence would be located immediately adjacent to the road. This would again require some shrub branches to be trimmed by a small amount.

From images on bing Bird's eye a couple of residents seem to have removed vegetation and open up views of the road in recent years.

The fence would be largely hidden from view by existing fencing and vegetation except for two locations where the vegetation was cleared.

Regards

Stewart
