Anita

I note the consultation response from the Councils Ecology Advisor dated 16 February 2021 which states : *We require an Extended Phase 1 Habitat Survey to be undertaken at the site, to determine which protected species are using the site and what the impact would be of the proposed development.*

This is a regularly ploughed field in active use for agriculture and there is no evidence or reason to believe that any protected species are present and the proposal is for permission to change the use of the land and does not seek permission for operational development that would require further planning permissions to be granted there is no policy requirement for such a survey so I will not be wasting your time or my time or money providing one.

Please determine the application as submitted in this regard

Paul Collins BA (Hons) DipTP
