Hello Andrew,

Please see my comments below to the following points raised by Ford Parish Council concerning Light Pollution:-

EH8 Light Pollution

All major development shall be expected to demonstrate through the submission of a lighting scheme that the lighting has been designed specifically to minimise the impact of the lighting on the night sky.

The planned development is essentially agricultural/horticultural in nature with 99% of site activity taking place during daylight hours. External lighting for access and security will be kept to an absolute minimum and will be of very low magnitude.

EH8.1 The Parish is largely unlit and any new development proposals will be expected to conform to the highest standard of light pollution restriction in force at the time. There will be a presumption against street lighting and support for low level lighting which preserves the views of the night sky.

Only low level lighting which preserves the views of the night sky will be used.

EH8.2 The Parish is visible from the South Downs National Park which has become the 11th site in the world to be made an international dark sky reserve by the International Dark-Sky Association (IDA).

Only low level lighting which preserves the views of the night sky will be used.

We will be very happy to fully comply with these points as Conditions applying to the Grant of Planning Permission.

Many thanks, John.

Mr. Hall,

F/30/18/PL - Wicks Farm Ford Lane

Can you please read the attached comment from the Parish Council and provide the necessary in for the development to comply with Policy EH8 – Light Pollution.

Thank you,

Andrew Wood MRTPI
