Subject: FW: F/30/18/PL - Wicks Farm Ford Lane

Hello Andrew,

Please see my comments below to the following points raised by Ford Parish Council concerning Light Pollution:-

EH8 Light Pollution

All major development shall be expected to demonstrate through the submission of a lighting scheme that the lighting has been designed specifically to minimise the impact of the lighting on the night sky.

The planned development is essentially agricultural/horticultural in nature with 99% of site activity taking place during daylight hours. External lighting for access and security will be kept to an absolute minimum and will be of very low magnitude.

EH8.1 The Parish is largely unlit and any new development proposals will be expected to conform to the highest standard of light pollution restriction in force at the time. There will be a presumption against street lighting and support for low level lighting which preserves the views of the night sky.

Only low level lighting which preserves the views of the night sky will be used.

EH8.2 The Parish is visible from the South Downs National Park which has become the 11th site in the world to be made an international dark sky reserve by the International Dark-Sky Association (IDA).

Only low level lighting which preserves the views of the night sky will be used.

We will be very happy to fully comply with these points as Conditions applying to the Grant of Planning Permission.

Many thanks, John.

Mr. Hall,

F/30/18/PL - Wicks Farm Ford Lane

Can you please read the attached comment from the Parish Council and provide the necessary in for the development to comply with Policy EH8 – Light Pollution.

Thank you,

Andrew Wood MRTPI

Subject: RE: Planning Consultation on: F/30/18/PL

Ford Parish Council does not have an objection to F/30/18/PL

We does however bring to your attention the Neighbourhood Plan Policies listed below

This application meets the Policies in the FORD Neighbourhood development Plan regarding agricultural developments shown below.

However we draw your attention to Policy EH 8 below concerning Light Pollution and ask that the development ensures it meets that policy.

6.4 Built-up Area at Ford

Policy BUA1: Built Up Area (BUA) boundary

The BUA boundary is defined on the Proposals Map.

Outside of the BUA, development will not be acceptable other than for the purposes of :

- Agriculture;*
- Forestry;*
- Recreation, or*
- where other policies within the Development Plan indicate otherwise*

BUA1.1 The boundary sets the distinction between the built form of Ford and the surrounding countryside and will protect the countryside from harmful development.

Preventing coalescence between Yapton and Ford is important to residents and will preserve the separate identities of the two communities (The Peregrines Estate has a BUAB defined within the Yapton BUAB specified by ADC).

Justification: NPPF11 ; Obj 6

Policy EH5 Grade 1, 2 and 3a Agricultural Land

No development (other than that specified as permitted development) will be permitted on land Graded 1, 2 and 3a as designated in the Agricultural Land Classification Map produced by Natural England (See the OpenGov data website), the exception being land allocated for development in the development plan and development required for the operational needs of agriculture. EH5.1 In order to safeguard future food production, and in turn, future employment in the locality, and to maintain the rural aspect of the parish.

Justification: NPPF 3,11; Obj 8

EH8 Light Pollution

All major development shall be expected to demonstrate through the submission of a lighting scheme that the lighting has been designed specifically to minimise the impact of the lighting on the night sky.

EH8.1 The Parish is largely unlit and any new development proposals will be

expected to conform to the highest standard of light pollution restriction in force at the time. There will be a presumption against street lighting and support for low level lighting which preserves the views of the night sky.

EH8.2 The Parish is visible from the South Downs National Park which has become the 11th site in the world to be made an international dark sky reserve by the International Dark-Sky Association (IDA).

Justification: NPPF11 ; Obj 6
