Hi Paul

Further to our telephone conversation last week on this project I attach a Designer's Response to your comments made after your site inspection. I have also attached a current as built plan received from the contractor which will be useful when reviewing our proposals.

The layout as currently constructed has not strictly followed the approved Planning Layout and we have revied for the Client and proposed that the contractor make the changes as noted in the designers response attached to bring the scheme in line with the Planning Approved Scheme. There are a couple of items where there appears no harm from leaving the details as constructed and where they occur we have noted no proposed changed and our reasoning.

Before we confirm and instruct the changes we thought it sensible to consult with you and ensure that if the proposal are adopted as noted you would be satisfied that the works would meet the drainage requirements. We note we may need to make a Non Material Amendment to the Planning for the potential change to the watercourse connection at the north of the site.

I trust this meets with your approval but if you have any queries please do not hesitate to contact me.

Regards

Stuart
