Representative Viewpoints

Representative Viewpoint 4 (Right) - Ford Road/Nelson Row, Climping (120m, south)

This view is from the north of Nelson Row that runs parallel to Ford Road facing west towards the Site. Direct views into the Site are obstructed by Lombardy Poplar and Leylandii tree belts located along a bund that follows the western edge of Ford Road. An elevated jet plane marks the entrance into Ford Market. To the north, St Andrews Church is partially visible between gaps in vegetation with the rising hills of the South Downs National Park providing the visible horizon. Arundel Castle is visible on the foothills of the South Downs to the right of the church.

From this location, the proposed development would not be visible in all durations as the retained vegetation along Ford Road will screen views. Scale of effects would be **Negligible** and **Neutral**.
