Representative Viewpoint 7 (Right) - Public footpath (356), north of Ford Lane, east of Yapton/North End (600m, north west)

This middle distance view is from a public footpath (356) north east of Yapton, north of Ford Lane facing south east towards the Site. The view is across large scale arable fields towards the western edge of the Site. The edge of the Site is demarcated by a Leylandii tree belt to the north of Navigation Drive development associated with Burndell/Yapton. To the north, immediately adjacent to this tree belt, a glimpsed distant direct view into the Site is available. Broadleaved woodland belts within the west of the Site are visible north of the Leylandii. Peregrine House to the far north-west of the Site is visible along Ford Lane. Views further east or south of the Site are screened by the aforementioned Site vegetation and also hedgerow field boundary vegetation to the north west of the Site.

From this location, the proposed development would be partially visible through and between intervening vegetation in medium distance views to the north-west of the Site. Dwelling rooftops would sit under tree lines in the foreground ensuring that a wooded skyline is maintained from this viewpoint. Scale of effect would be **Small** and **Adverse** at all durations.
