

Representative Viewpoint 10 (Left) - Open space off Benjamin Gray Drive, Littlehampton (2.1km, east)

This middle distance view is from a footpath within public open space associated with housing development off Benjamin Gray Drive, Littlehampton facing west towards the Site. The view is across flat open space in the foreground with newly planted trees and shrubs to a localised ridgeline where land slopes down to the River Arun. Views continue across the valley floor towards the east facing side of the valley where vegetation associated with the western edge of Ford Road is seen as the visible horizon. The vegetation comprises of evergreen and broadleaved trees that provide a continuous screen to the Site. The elevated jet plane is visible punctuating this line of vegetation that demarks the entrance into Ford Market.

From this location, the vegetation along Ford Road obstructs views to the proposed development within the Site and therefore scale of effect in all durations would be **Negligible** and **Neutral**.
