

Dear Sir/Madam

Thank you for consulting Network Rail, please see attached Network Rail’s response to planning application **F/4/20/OUT – Land at Ford Airfield Ford, West Sussex.**

Network Rail’s level crossing team also raised concerns regarding the accumulative impact of developments in the area. The Ford Airfield development is just one of many other smaller developments in the area as a whole, all of which are adding to the traffic volumes in the area and resulting in higher daily use at Level crossings. From a rail perspective, this large development should not be considered in isolation but form part of a far greater ‘holistic’ view of the impacts all developments in the area would cause. Network Rail believe some level crossings would benefit from closure in this area and are keen to work with the council to ensure occurs.

Kind Regards,
