[illegible]

Hi Ray,

Please find attached the revised Waste Infrastructure Statement and a noise assessment update. As per the Statement of Conformity these provide no change to the overall conclusions, effects or impacts from or on the development.

The documents have only been updated to align with the revised parameters/each other. The WIS has also been updated to reflect the agreed modelling approach with Southern Water and EHO. Updates to section 4 of the WIS relate only to the plans, with no updates to the mitigation recommended or approach for a condition.

Given the minor updates do not change the conclusions, mitigation or agreed condition approach for noise, in our view a re-consultation is not required.

Just to confirm, we have also received confirmation this morning that Fiona agrees to the :3 contour for Southern Water.

Kind regards,

Jen
