Sorry Anita,

There are so many apps for Wicks Farm, it gets confusing. If there are already planning conditions in place for the polythene, then no, we would not request any further conditions due to the change to glass (only if there were none requested before). It may affect the content of the DOC's, but as long as they are both considered impermeable, with no change in dimensions, and designed for in the surface water drainage scheme then there should be little difference.

Kind Regards

Sarah Burrow

Dear Sarah,

Given that Paul is away this week and this application was on the priority list from Dan for response, would it be OK to assume that the change from polythene to glass would not alter the comments made on the original application F/30/18/PL where the drainage conditions imposed are currently the subject t of DOCs? If so there would be no need for further comment.

Thanks

Anita
