Further to your email dated 8 April 2021, please find below a more descriptive description as requested.

Proposed first floor extension above existing rear ground floor bedroom together with new Sussex Barn Hip and gable to north elevation, to match existing south elevation and to replace existing full hip. Extension to existing first floor loft accommodation including new flat roofed dormer to the rear (east) roof slope and minor adjustment to the existing front (west) dormer. Also, the addition of velux roof lights to the north, south and west roof slopes.

I hope this will suffice but if there is anything further, please contact me direct at:
