

Subject: K/3/14 69 Coastal Road

Dear Mr Roberts,

Objections to revised plans:

Separate one-storey triple garage facing east: an unsightly addition to depress the street scene at the end of this cul-de-sac where most garages are integral; (If such a building is permitted it should face south ie towards the new-build rather than towards the road)

Third storey sunroom : we have objected to a third storey on this plot on each occasion that planning consent has been sought. A sunroom in such a location is obviously unnecessary and an enablement for rooftop amusements which also blocks sunset light from the surrounding houses.

For the second consecutive year my house will be in the midst of builders' noise and parking chaos. Can Arun ensure considerate construction, noise abatement, considerate working hours and even leave the central summer months (when everyone wishes to enjoy their gardens) annoyance free?
