Subject: Land East Of Kingston House Kingston Lane Kingston BN16 1RP - K/54/20/PL

Planning application Reference: K/54/20/PL

Proposal: Single storey 4 bed dwelling & stable block (resubmission following K/16/19/PL. This application is a Departure from the Development Plan & is in CIL Zone 3 & is CIL Liable.

Address: Land East Of Kingston House Kingston Lane Kingston BN16 1RP

Dear Zac,

Environmental Health has no objection in principle to the above proposal, however the following matters must be considered:

Contaminated Land

Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

1. A Preliminary Risk Assessment which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; potentially unacceptable risks arising from contamination at the site.
2. A Site Investigation Scheme, based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. Based on the Site Investigation Scheme and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.
4. A Verification Report providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a long-term monitoring and maintenance plan for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To protect the amenity of local residents

Construction

No development shall take place, including any works of demolition, until a Construction Management Plan has been submitted to, and approved in writing by, the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters:

- a) An indicative programme for carrying out of the works;
- b) Details of the arrangements for public engagement / consultation both prior to and continued liaison during the construction works;
- c) Measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s);
- d) Details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination;
- e) The parking of vehicles of site operatives and visitors;
- f) Loading and unloading of plant and materials, including permitted times for deliveries;
- g) Storage of plant and materials used in constructing the development;
- h) The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
- i) The provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulations Orders);
- j) Measures to control the emission of dust and dirt during construction;
- k) A scheme for recycling / disposing of waste resulting from demolition and construction works i.e. no burning permitted.

Reason: To protect the amenity of local residents

Construction hours

No demolition/construction activities shall take place other than from 08:00 hours until 18:00 hours (Monday to Friday) and from 08:00 hours until 13:00 hours (Saturday) with no noisy work on Sunday or Bank/Public Holidays.

[In addition to these hours of working, the Local Planning Authority may approve in writing a schedule of activities where it is necessary to conduct works outside the hours specified in this condition]

Reason: To protect the amenity of local residents

Noise

Prior to occupation, a scheme shall be submitted for approval to the Local Planning Authority detailing measures to control air-borne and structure-borne noise transfer produced by the proposed ground/air source heat pump/s. The noise mitigation scheme should be maintained and shall not be altered without the prior written approval of the Local Planning Authority.

Reason: To protect the amenity of local residents

Manure

Prior to the commencement of the development, details of where and how manure is to be stored and ultimately disposed of shall be submitted to and approved in writing by the Local Planning Authority. Once the use commences, this shall be carried out in accordance with the approved details. No manure or waste materials shall be burned upon the land within the application site.

Reason: In the interests of residential amenity and to prevent pollution of any watercourse.

Advisory - Sound insulation

I have not commented on matters relating to sound insulation as I assume that Building Control will ensure that the Building Regulations, Approved Document E is applied

Advisory - EV Charging points

To encourage the uptake of zero emission vehicles in efforts to reduce air pollution it is recommended a number of the parking spaces are installed with electric vehicle charging points. Cabling could be installed in the remainder of the parking spaces to allow for additional charging points to be installed at a later stage.

Thank you for your consultation,

Sincerely, Craig
