

Hi Phil,

I spoke to the Harbour Master, regarding the Impact Statement, his response is in his email. I hope this answers that question. Also enclosed are all the other questions I have asked the HM.

I hope this helps.

Yours aye
David

Subject: RE: Dismantling the Sea Cadets Jetty

Hi David,

Good to speak just now. I understand you need some sort of impact statement from me / LHB for the council Planning Permission.

I can confirm that the project sits entirely within the agreed mooring envelopes on our harbour plans so the project will have no adverse impact for LHB.

As you know, I strongly feel the old jetty needs to be removed as soon as possible as it is breaking up and creating hazards to navigation. That said, I fully appreciate the plan you had involving the Royal Engineers has been delayed due to the pandemic.

As discussed, LHB's formal marine consent for the works (under section 43 of our act) will be issued when the construction methodology and timescales are finalised. As discussed, for a project such as this, this can be achieved within a week as it falls within my delegated authority from the board.

In summary, rest assured that LHB support the project and are happy that the latest pile, pontoon and gangway designs provided will have no impact for commercial or leisure operations in the harbour. The construction process itself might have temporary impacts, but they are all manageable with cooperation.

Kind regards,

Harry Gregory
