

Original specification comparison to substituted equipment

Roundabout

Original specification

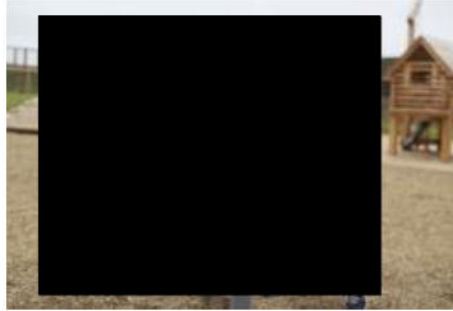

Substitute

We have substituted a HAG8093902 Spinmee inclusive roundabout manufactured by HAGS for an inclusive roundabout manufactured by Buglo. The substituted item offers the same play value as the original specification, sitting flush with the surrounding surfacing level, to ensure unimpeded access for wheelchair users. The substitute item has space for a wheelchair user and carer, as with the original specification item.

Original specification

Substitute

We have substituted a 6.11700 Small See-saw originally manufactured by Richter-Spielgeraete, for a seesaw manufactured by Lappset. Both seesaws offer the same play value, having a central spring / rocking mechanism, and allowing two users to play on the seesaw at one time.

Original specification

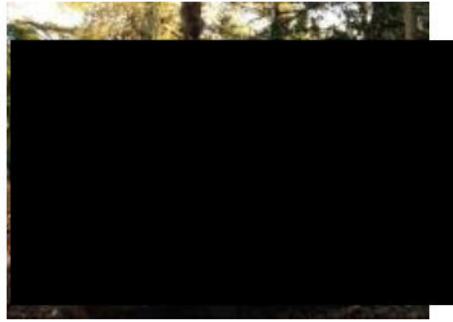

Substitute

We have substituted the H8046914 Unimini Imse multiplay activity tower manufactured by HAGS, for one manufactured by Lappset. Both structures have similar play value, with three platform decks, a slide, and multiple access routes to the decked areas. The lappset item has the added benefit of a fireman's pole.

Original specification

Substitute

We have substituted the 6.27300 Wobble Dish manufactured by Richter-Spielgeraete, for a spinning dish manufactured by Play and Leisure. Both items rotate on their base and can fit 1 child in, and they have very similar levels of play value.

Original specification

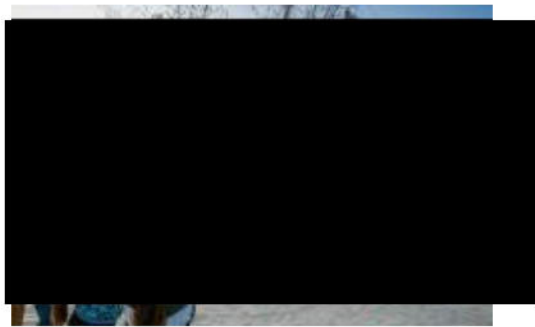

Substitute

We have substituted the 6.51021 / L6.51021 Climbing Structure 21 manufactured by Richter-Spielgeraete for a Calmber Stack manufactured by A E Evans. Both items follow a similar design, of intersecting timber posts, that provide low level climbing for multiple users at one time.

Original specification

Substitute

We have substituted the 6.14520 Cradle Nest Swing manufactured by Richter-Spielgeraete for a basket swing manufactured by Lappset. These items have identical play value, offering a large surface area that can either accommodate solo users, up to 4 children at one time for social play, or for less able bodied children to lie flat against, in a way not possible on traditional swings.

Original specification

Substitute

We have substituted the Omega Base AW Module (CC) for 2 seat frame, manufactured by HAGS, for a similar swing frame, manufactured by Lappset. The original specification included a cradle seat swing, and a “mirage” Swing seat. Our substitute will feature the same specification of swing seats, giving identical play value to the swing originally specified.
