Dear Anita,

I hope you had a nice easter long weekend. Thank you for all the progress made with Bryony in my absence.

With regard to proposed conditions 6, 7 and 9 please see the following.

Condition 6:

- Is the 'approved remediation strategy' referenced in the proposed wording the submitted Remediation Method Statement (LEAP 12 March 2021)?
- Can you confirm that 'construction work' would exclude the enabling works referenced in proposed condition 9?

Condition 7:

- Agreed

Condition 9:

- Agreed

Thank you,

Oliver

Thanks Bryony.

Following liaison with the relevant consultees we are now only proposing the 3 pre-commencement conditions as set out below:

(6) The scheme shall be implemented as approved and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a long-term monitoring and maintenance plan for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority. The report shall provide details of the data that will be collected in order to demonstrate that the works set out in the remediation method statement are complete and identify any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to the components, relating to ground investigation works and remediation method statement require the express written consent of the Local Planning Authority.

Reason: To protect the amenity of local residents in accordance with Policy QE DM4 of the Arun Local Plan.

(7) No development shall commence until a Construction Management Plan has been submitted to and approved in writing by the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters,

- the anticipated number, frequency and types of vehicles used during construction,
- the method of access and routing of vehicles during construction,
- the parking of vehicles by site operatives and visitors,
- the loading and unloading of plant, materials and waste,
- the storage of plant and materials used in construction of the development,
- the erection and maintenance of security hoarding,
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- details of public engagement both prior to and during construction works.

Reason: In the interests of highway safety and the amenities of the area in accordance with policy T SP1 of the Arun Local Plan. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

And

(9) Development shall not commence, apart from the enabling works - listed below, until drainage details of the design of a whole site surface water drainage scheme has been submitted to and approved in writing by the Local Planning Authority.

The 'Enabling Works' shall comprise the following, and these works shall not be subject of the conditions of this Permission unless expressly stated in any individual condition:

- (a) site investigations or surveys;
- (b) ecological preparation works;
- (c) the provision of security fencing, hoarding and sales signage;
- (d) the clearance of the Site;
- (e) the provision of any temporary site point of access for construction traffic; and
- (f) provision of temporary Welfare & Accommodation;

- (g) temporary builders supply (electricity, water, data etc);
- (h) works connected with ground infilling or regrading;
- (i) Work to remove soil mounds and any associated levelling and remediation;
- (j) topsoil strip and re-grading of levels, (k) any temporary construction road or "haul road" to facilitate enabling works;
- (l) works for the provision or removal of drainage or mains services to prepare the Site for development;
- (m) installation of temporary sales and marketing suite including show home and temporary parking.

No building shall be occupied until the complete surface water drainage system serving the development has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

Please can you confirm your agreement to their imposition?

I await your response regarding the requested EOT. I have not received a completion notification from our solicitor yet.

Regards
Anita

Dear Anita,

Thank you for your email.

The Boklok Delivery Team has confirmed it would be a temporary route to the show homes.

I trust this information allows the relevant condition to be applied.

Kind regards

Bryony

Dear Bryony,

I have received the below response from our Engineers. Please can you confirm if temporary access to the units is proposed?

Thanks

Anita

Subject: RE: LU/116/21/PL- Land South of the Academy

Dear Anita,

We had previously accepted all of the Conditions suggested by the Applicant with the exception of the last, which relates to the proposed show home(s) and was a late addition.

The location is in an area where there should be sufficient infiltration to drain the show home(s) although there is still some variability in that area.

I am not sure what the extent of the construction will be – i.e. are there plans to allow the construction of access to the property (in order that prospective purchasers can enter the units without wading through mud). You will appreciate that the proposed roads may form part of the surface water drainage solution and so we would not want to agree to that just yet. However, if temporary access to the units is proposed then I can see no reason to refuse this addition to the Conditions.

Regards,

Roger
