Dear Resident

March 2024

Keeping you informed – Littlehampton Gasholder Remediation

We're getting in touch to let you know about some upcoming works that we'll be carrying out on the land at the former Littlehampton Gasholder site, off Palmers Road.

Following the successful completion of ground investigation works, SGN is now ready to begin environmental improvement works on the site. The reason for the improvement works is to minimise possible future impacts to groundwater and adjacent residents from buried structures at the Littlehampton site.

Our specialist contractors will be on site from early- August 2025 to early October 2025. The work will involve some excavation and infilling works. The works are expected to take approximately 9 weeks to complete, with varying degrees of site attendance. These works have been approved by Arun District Council and the Environment Agency. The work will be undertaken during working hours, these will be 8am – 6pm Monday to Friday and if required, 8am -2pm on Saturdays.

All such works have the potential to generate odour, dust, noise and vibration, however these issues will be proactively monitored and managed by our specialist contractors Erith. Throughout the works, ongoing monitoring will take place and where necessary mitigation measures will be employed. The methodology and mitigation measures have been agreed with Havant Council.

These works will then allow us to plan for the relocation of mobile phone equipment off the gasholder and the eventual dismantling of the gasholder which are separate pieces of work.

We will work proactively to minimise the impact our work may have on our neighbours and if you would like to discuss the project further, we would be able to arrange a meeting, either in person or virtually.

Please do email our community relations manager: [REDACTED] if you have any questions.

Thank you for your patience as the works begin on site.

Yours faithfully

Scott Lewis

Project Manager
