5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

The application is for the installation of a 4m high timber sculpture shaped in the form of three waves, fixed to a concrete base which sits 200mm above ground level. The sculpture will be located at the southern end of the avenue path which connects Littlehampton Wave to Sea Road, to be visible from the road and to pedestrians walking along the promenade.

The former leisure centre could be identified from a distance, by way of the prominent brick pier at the front of the building and served to draw attention to approaching vehicles. The new Littlehampton Wave is set further back from the road therefore the intention is to introduce a totem feature to signpost its location. While it is not intended to incorporate signage or wording on the totem, there will be a positive connection with its location at the top of the access path and in particular its wave design, which reflects the coastal setting and name of the new leisure centre.

The timber used to produce the wave sculpture was salvaged from the pool hall in the former leisure centre before demolition. The information submitted includes a mock-up artist impression of the proposed design of the sculpture set in its site context and is indicative of its scale.
