Hi Michael

As you know, construction of the bypass started on the 6th January and is now well under way so it will be difficult to carry out an updated badger survey: the site has been stripped and hard core placed.

However, there has been on-going monitoring on site for badgers (and ecology generally) and the former is covered on page 5 of the CEMP (attached). As you know, the CEMP covers ecology during construction. Please note there was no evidence of badgers at the time of the original survey.

In terms of bats, the purple asterisks on the plan denote vegetation hop-overs, provided by proposed trees (see screen grab below). Please note that the majority of proposed planting is native which is suitable for bat habitat.

I would be grateful if you could forward this email to Liz Annalls.

Kind regards

Rob
