Dear Sir / Madam

I am writing to you about the planning application North of Toddington Lane Railway line LU/162/17/PL. I do appreciate that there is a need for more housing, but I feel that at this moment in time this Development is not suitable, as there is no infrastructure in place, and the new Bypass completed. There is a very large increase in traffic since the new developments are being built, and the proposed development is in a very dangerous place for traffic to access and exit. Although it would be nice to tidy up the site as it is an eyesore. If this development was to be agreed to there would be sufficient road verge and parking, and that the privacy of the existing property would not be compromised, I feel that the number of houses proposed for this development is more than adequate for the site.

Yours Truly
