EH comments in relation to LU/167/18/DOC

Having reviewed the submitted documents I am satisfied with the documentation presented. Furthermore the clarity of the vibration report and the manner in which it was laid out, made for clear reading and the consultant should be commended for this

LU/167/18/DOC relates to...

'Approval of details reserved by condition imposed under LU/251/15/PL relating to conditions 3-schedule & samples of materials & finishes, 4-landscape scheme, 5-waste storage, 6-surface water drainage, 8-materials for boundary fences & gates, 10-bicycle storage & **11-vibration assessment**'

I feel that the report submitted by Acoustic Associates Sussex Ltd [Ref: J2370 dated 20/12/2017] sufficiently covers the vibration assessment for this development and sets out the justification that the VDV_{day} and VDV_{night} are such (when measured) that adverse comment is not expected upon the planned development completion; therefore Environmental Health are satisfied that Condition 11 of LU/251/15/PL has been met and have no further comments pertaining to LU/167/18/DOC

Kind regards

Christopher Davis
