Ref LU/168/18/TC. Attn: Amber Willard
Felling of trees in a conservation area.

Dear Sirs

I strongly object to this application
to fell 2 mature trees.

These trees are mature sycamore trees
planted 25 yrs ago by the developer John
Molem to the perimeter of our site,
myself and family have watched the
trees grow over this period and ~~see~~
to be destroyed for no good reason other
than the public house adjacent wants
them to be.

My flat is along with others are very close
to the Pub side and rear garden

the trees form a shield to our flats against wind and hot sun in the summer months and provide a cloak to the music and noise which comes from the Pub, it can be very loud and goes on late into the evening. The side doors to the patio area is always left open on warm days.

There is a long history of environmental nuisance/noise from this pub. It is now much improved but the residents do not wish it to start up again. The trees are alive with birds and for these reasons I ask that this application to destroy these healthy trees be refused. We are in a conservation area and have already lost 3 trees on our quay which were not replaced by the contractor carrying out the flood prevention works.

Yours Faithfully

owner.

P.S.

This application is invalid

The applicant 'Jordan Cook Management' company have today informed me that that ^{they} did not put this application in and deny all knowledge of it, (the application that is)

This is tantamount to fraud and I will be looking into it and possibly take legal action if impropriety is found. any decision must be stayed.
