GENERAL NOTES

- This drawing is to be read in conjunction with relevant architectural and engineering drawings.
- Levels indicated in blocks are finished floor levels and are 150mm above adjacent finished ground levels unless otherwise shown.
- Levels of the existing road at the point of tie-in with proposed site road must be checked prior to commencement of works.
- Any discrepancies between the details shown and actual on site conditions to be reported immediately to the engineer prior to commencement of works.
- The Contractor is to check and verify in conjunction with the Architects details all setting out points, building and site dimensions, levels and sewer invert levels & connection points and ensure that they are fully consistent with the contents and requirements of the site investigation report before work starts. The Contractor is to comply in all respects with current building legislation, British Standard Specifications, Building Regulations etc. whether or not specifically stated on this drawing.
- This drawing is not intended to show details of ground conditions or ground contaminants. Each area of ground relied upon to support any structure depicted (including drainage) must be investigated by the Contractor any areas of foundation failure or details which do not comply with the indicated conditions as detailed in the site investigation report are to be immediately notified to the Engineer, where applicable. Any suspect fluid ground or ground contaminants or where the ground should be further investigated by a suitable expert. Any earthworks shown indicate typical slopes for guidance only and should be investigated further by a suitable geotechnical expert.
- Where existing trees are shown to be retained they should be subject to a full Arboricultural Inspection for safety. All trees are to be planted so as to ensure they are a minimum of 5 metres from buildings and 3 metres from drainage and services, where applicable. A foundation is to be provided to accommodate the proposed tree planting, where applicable.

EXTERNAL WORKS & FEATURES NOTES

- All retaining structures to be designed by a structural engineer.
- Type of retaining structure to be confirmed by the client.
- Extents of illustrated retaining structures, exposed brickwork below DPC, tanking, and double DPCs are shown as indicative only and may vary due to site conditions.
- Retained heights shown are indicative and may vary along the length of feature.
- All 1st path or drive gradients shown must provide suitable cross-fall (1:40) to ensure drainage of any surface water.
- All plots have been designed to Part M (Category 1) requirements unless we have been directly instructed by our client. Any plots that fail to meet the necessary requirements should be reported to the engineer immediately, prior to construction.
- Any additional Part M requirements (i.e. Category 2 or Category 3) must be confirmed to the engineer in writing prior to commencement of any construction works.
- All proposed shed levels are based on garden gradient illustrated and may vary due to site conditions.
- All rear garden gradients are approximate and may vary due to site conditions.
- The contractor is to ensure that all proposed banks do not have any effect on surrounding infrastructure or buildings regardless of whether they are proposed or existing.
- The contractor is to ensure that all proposed parking bays / access paths are built to the correct dimensions. Any retaining features that breach the required dimensions must be reported to the engineer immediately, prior to construction.

SHEET LAYOUT SCALE = 1:5000

External Levels & Features Legend:

Levels	External Works
80.00 Proposed Finished Floor Level	Ddpc Proposed Double Damp Proof Course
60.00 Proposed Garage Level	450dpc Proposed Exposed Brickwork (minimum below damp proof course)
80.00 Proposed External Spot Level	450dpc Proposed Tanking (minimum above damp proof course)
Proposed Fall Direction	450RW Proposed Masonry Retaining Wall
Part M Level Access Indicator	300GB Proposed Gravel Board
Proposed Aco Drain	Proposed Bank / Slope = min. gradient = 1 in 5 = max. gradient = 1 in 3
Proposed Dish Channel	4s Proposed Steps
Proposed Gully & Level	
Proposed S38 Road Gully (subject to the relevant Highway Authority Approval)
