RPA Calculation
(Single Stem Tree)

RPA (m²) Stem Diameter = approx 1.5m*12= (sq r) = 3.142 r

Radius around perimeter of effected trees minimum of the above as shown on the enclosed plans 12* the stem diameter (girth is given as approximation and can be adjusted to suit.

The remaining stems are significantly smaller than the above calculation and will be treated in accordance to the best practice as above.
