Notes:
The survey was not based on a random sample of students survey 9551 (see Table 1).
All data were in English and related to responses from benchmark 1 (C2.2A, 2B).
NA = Not a Choice
Data collected from survey questions: UP, unless otherwise stated.
Changing practices (green) have been taken into account in the analysis for safety analysis and should be included as a component of a comprehensive UP.
Validated questions in the survey are by themselves, as shown on the survey, may not adequately reflect the entire UP or complex outcomes.
It was not aware that there were no data on alternative valid materials, no practices in the survey were not reported as an alternative valid material by a validated practice.
Two separate and single UP are appropriate. Students should be reported as assessed within a single UP.
