Dear Sir or Madam

I've wrote before I think it would be a bad idear to build the flats and house on the car park. We own our haine could been here 10 years. We have had lots of flood's in car park and taxi and anbulance have been unable to go round back. It will not look good if we want to Sale our house in near future plus there will not be room for a car We need that space

We do not want to move but the house will face us and we not feel private and Quite any more. Why take away our car parks you have other places you can build you are not thinking of us or any of our naybours that own there houses. This is all wrong We like to feel we can go out our back ways with freadem and not have only a small path what about dustman ect -

yours faithfully [redacted]

I'm under hospital with kidneys and very Stress about this
